

How to launch an APM remote invigilated examination

Please read all information on the examination screens carefully.

1. Once you have completed the environment checks - Click the start exam button.

From this point forward you will be under examination conditions. Please ensure that before you commence your examination you have read the <u>rules and regulations</u> and you have closed down all other applications except for Google Chrome

A pop-up reminder will appear, requesting that you do not leave the ProctorExam page during your examination. If you do close the ProctorExam page at any point during your examination, your attempt will be voided due to a lack of invigilation footage.

2. Click OK
